

UNIK TECHNO SYSTEMS PVT. LTD.

LIST OF MACHINES, EQUIPMENTS, JIGS AND FIXTURES BEING MANUFACTURED BY US

1. Positive tubular plate filling machine with dust collector
 2. Vacuum dry charging machine with electrical controls or with PLC and data logger.
 3. Lead melting furnace – Electrically heated with temperature controller.
 4. Plate lug brushing machine with integrated dust collector.
 5. Lead melting furnace – Gas heated with temperature controller.
 6. Component moulds for pillars, connectors etc.
 7. Tubular bag (Gauntlet) cutting machine.
 8. Paste mixer – sigma type.
 9. Pasted plate pressing roller.
 10. Ribbon blender.
 11. Sandwich assembly jigs for battery group making.
 12. Combs and Dams for battery plate grouping.
 13. PP Industrial (Traction) cell container cutting machine.
 14. PP monobloc container hole punching machine.
 15. Inter cell welding machine.
 16. Heat sealing machine.
 17. Air pressure (Battery Leak) testing machine – Individual Cell with PLC control and datalogger.
 18. Air pressure (Battery Leak) testing machine – 6V or 12V battery with PLC control and datalogger.
 19. Short circuit testing machine / High voltage tester.
 20. Batch number or serial number punching machine.
 21. Spine grid cutting & tubular bag insertion arrangement.
 22. Paste density checking penetrometer.
 23. Scott volumeter for oxide apparent density checking.
 24. Oxide & Red Lead density checking Scott Volumeter.
 25. Plate weight checking Range Settable Type digital display machine.
 26. Pasting Machine.
